As an education provider, it was vital that the performance facilities at Kings School Canterbury offered students and staff a high performance learning and training space which would meet the needs for both recreational users and those undertaking sports and fitness courses. As well as the provision of top-quality equipment, there was a requirement for Perform Better to create an exciting and functional layout that would meet the needs of the various stakeholder groups using the facility.

Being chosen as the preferred partner for the gym design and installation was an exciting opportunity for Perform Better to show our creative approach to maximise the spaces available for the intended purposes.
